Skills: Arachnology, Data-driven Detective Analytics
_____

Wednesday Addams Google hits trend chart!

Experience

Sr. Data Journalist, Nevermore (2022 - present)

- Independently analyzed student journeys among peers to create a classification model for identifying sketchy monster

- Optimized data gathering and research based on new and evolving constraints by the school principal and sheriff
- Suspected every stakeholder I came in contact with following "Trust but verify" data philosophy
- Developed AI based psychic visions in my head to create a propensity model for incident occurrence with 100% accuracy
- Successfully led a team of trusting peers multiple times to face dangers risen from bad data collection
- Expertly coded in multiple languages like Latin and German
- Developed algorithms using Natural Language Processing and Deep Learning models to communicate with dead and alive stakeholders

Hobbies

- Dancing like nobody is watching
- Being cold and distant in an adorable way
- Not hugging
